IOT FREE TRIAL

GET READY FOR INDUSTRY 4.0

IDENTIFY YOUR EQUIPMENT FOR MONITORING

Work with our engineering teams to explore why and what to monitor in your plants. This may be rotating equipment like pumps, motors, compressors, drives, spindles or other machinery. Understand why you want to monitor them

SLAP ON OUR SENSORS

Our sensors magnetically can be mounted on your equipment in minutes and installed even by a non technical person. There is no hard wiring, no integration and the sensors connect through BLE or Wifi to the cloud. It then literally takes minutes to showcase your real time data on our dashboard in the cloud.

PLAY WITH YOUR REAL TIME MACHINE DATA

Work with our experts in reviewing and analyzing your data in the cloud. Our expertise combines data scientists and analysts with reliability engineers and vibration expertise and for this trial period, we give you access to all this expertise and software free of charge

TALK TO US ABOUT HOW TO MAKE SENSE OF THE DATA

Our experts can help provide training for you to read our dashboards, answer your questions and then work with you to help understand the "value" the data can provide to your operations. How does the data link to your OEE or to help predict early failure – tap in to our patented AI algorithms

DECIDE IF YOU WANT TO KEEP THEM!

You get to try our sensors, devices, ML algorithms and get access to our experts FREE for the period of the trial. After this, you are free to decide whether you want to continue with our services. There is no commitment and we understand if this is not for you or you are not ready!
